(1) Underwriting income is defined as net earned premiums less net claims incurred, net acquisition costs, operating expenses, and excludes any impact of change in discount rate on claims and corporate expenses.

Direct Written and Net Earned Premiums

In the third quarter of 2021, direct written premiums increased by $6.7 million compared to the same period in prior year. The increase was largely due to the new business written in Commercial and Personal Lines in Quebec in the third quarter of 2021 of $5.8 million that was not there in Q3 2020. Also new business of $0.1 million was written in the third quarter of 2021 in Ontario as commercial license was granted in May 2021. Net earned premiums increased by $4.5 million in the third quarter of 2021 compared to the same period last year. For the nine months ended September 30, 2021, direct written premiums increased by $16.4 million compared to the same period last year while net earned premiums increased by $10.7 million in comparison. $13.2

million increase related to Quebec and Ontario.

Claims Incurred

For the quarter ended September 30, 2021, net claims expense was $1.3 million higher than same period in the prior year and for the nine months ended September 30, net claims expense was $3.0 million higher than the same period last year. This increase has been largely due to premium growth.

Acquisition Costs

Acquisition costs, which consist mainly of commissions, premium taxes and general expenses related to policy acquisitions, increased by $1.5 million in the quarter ended September 30, 2021 compared to same period last year. For the nine months ended September 30, 2021, acquisition costs increased by $3.2 million compared to 2020. This increase was a result of higher premium volume for the Company, higher commission rates for commercial lines, and higher accrual for broker profit commissions.

Operating Expenses

Operating expenses were $0.7 million higher in the third quarter ended September 30, 2021 and $1.6 million higher for the nine months ended September 30, 2021 when compared to the same periods last year largely due to increased costs related to salaries, depreciation and IT expenses.

Underwriting Income

Underwriting Income of $1.4 million was recorded in the third quarter of 2021 compared to an underwriting income of $0.4 million in the same period in 2020. For the nine months ended September 30, underwriting income increased to $4.9 million in 2021 from $2.0 million in 2020. The improvement in results is attributed to higher revenue as the Company grew its commercial and personal business in Quebec along with writing new business in Ontario, while also experiencing a lower loss ratio compared to last year.

Impact of Change in Discount Rate on Claims

The discount rate used to discount future claims payment is based on the expected yield on investments. The discount rate used in the quarter ended September 30, 2021 was 1.88%, compared to 1.75% used for the year ended December 31, 2020.

Investment Income

Investment income was $2.5 million lower in the third quarter compared to the same period last year while for nine months ended September 30, investment income was $2.2 million lower compared to same period last year. This is largely because in the third quarter of 2020, the Company sold a majority of the common shares portfolio to pay special dividends to the shareholders after the European operations litigation settlement.

Net Income before Income Taxes

Net income before taxes was $1.6 million in the third quarter as compared to income of $3.2 million in the third quarter of 2020. For the nine months ended September 30, net income before income taxes increased to $5.9 million from $5.1 million in the same period last year. The decline in the third quarter of 2021 in net income before taxes when compared to the same period in 2020 is largely due to the lower investment income while underwriting income increased. For the nine months ended September 30, the improvement in underwriting results in 2021 was the result of improvements in underwriting results more than offset the reduction in investment income.

Income Taxes

For the quarter ended September 30, 2021, the total Income tax expense was $0.5 million as compared to $0.1 million for the same period last year. For nine months ended September 30, the income tax expense was $1.6 million compared to $0.7 million last year. See effective tax rates note 10 to the unaudited condensed consolidated interim financial statements for the nine months ended September 30, 2021 and 2020.

COVID-19 PANDEMIC

Due to the strict restrictions on activity in early spring combined with rapid gains in vaccinations, the numbers of COVID-19 cases have gradually decreased and we are seeing the gradual re-opening of the Canadian economy in the second half of 2021. However, the risk of COVID-19 still remains but varies between and within communities and regions. Currently, COVID-19 did not have any significant impact on the results of the Company, but the impact remains uncertain as the pandemic evolves.
